37-6552	EMD F40PH Amtrak Phase III #391	\$125
37-6553	EMD F40PH Amtrak Phase III #400	\$125

Amtrak Superliners have become the standard in almost all passenger train service all across America. In use since the 1980's, these double decker passenger cars are designed to maximize comfort and seating.

Kato's new HO Superliners surpass any previous passenger car with their superb detailing inside and out, trucks featuring super smooth rolling wheels, moving bearings and shock absorber construction.

Most exciting is the revolutionary marker light system implemented in each car, which allows a drop-in light board to be inserted into the base of the car and illuminate the marker lights on either end of the cars.

Each Amtrak Superliner Coach comes with a single tail marker light PCB.

This PCB can be installed in any Kato Superliner Passenger car or Material Handling car through one of the built-in hatches on the base of each car.

An easily removable panel toward both the front and rear of the car makes adding or removing the tail marker light board simple yet effective. You can effectively illuminate the tail end of a trailing car in a consist in this revolutionary manner.
