New Road Numbers for P42s and Superliners, Phase III and IV

AMTRAK route map

It's an Amtrak World

Nearly two thousand passenger cars are pulled by over 300 Amtrak locomotives all across the United States; coming and going as they make stops in major cities such as Chicago, New York, Los Angeles, and Seattle. Amtrak runs through as many different terrains as there are states, from mountains to valleys, over rivers and deserts.

Amtrak passenger consists to and from these cities are as varied as their destinations, depending on the length of trip and the route they will be taking. A consist can be as small as a single locomotive and a handful of cars, or it can run as many as four locomotives with over a dozen Superliners in addition to the cargo-carrying Material Handling Cars.

With Kato, you can let your imagination run wild, creating any number of Amtrak consists with our varied locomotive numbers and car sets. Start small with a local passenger service, or simulate a sprawling transportation empire with multiple trains and lines; there's no limit!

GE P42 "Genesis" Locomotives - *New Road Numbers*
